Group I KRAKE .*

2. Group II was under construction at the Peenewerft (Peene Shipyard) in Wolgast. The targets for the completion of the first vessels were 1 Movember 1954 because of the scarcity of materials and the lack of skilled workers. Vessels unknown at the time.

3. Building Group III (MRAKE) was not yet started. It was only in the stage of preliminary planning for 1955.

There was an extremely serious shortage of skilled workers at VEB Schiffselektrik Rostock (Rostock Marine Electric Nationalized Plant) which affected the entire shipbuilding pregram and made it impossible, in most cases, to meet the target for the electrical equipment of the new ships as well of the repairs. Efforts made for weeks to overcome this shortage of skilled workers have proved as unseccessful as ever.

comment. The Group L-vessels, are commissioned vessels of the Sea Folice.
